PROFILE SUMMARY

Full Stack Software Engineering undergraduate with 6 months of industry experience developing web applications using Vue.js, Spring Boot, and Firebase. Skilled in building responsive user interfaces, designing REST APIs, and working with real-time and relational databases. Experienced in Agile team environments, contributing to feature development, debugging, and performance improvements. Passionate about developing scalable, user-focused web solutions and continuously improving technical expertise.

EDUCATION

Bachelor of Software Engineering (Honors) - The Open University of Sri Lanka

Present

A/L

Wayamba Royal College

TECHNICAL SKILLS

Frontend:

Vue.js, HTML5, CSS3, JavaScript, Tailwind CSS

Backend:

Spring Boot, Firebase, REST API Development

Tools & Technologies:

Git, GitHub, Figma

Database:

MongoDB, MySQL, Firebase Realtime Database

Familiar With:

React.js, Flutter, Flask

EXPERIENCE

Web Developer Intern – GTS Active Company (6 Months)

Nov 2025 – May 2026

During my 6-month internship as a Web Developer at GTS Active Company, I developed and maintained responsive web applications using Vue.js, improving user interface performance and usability. I designed and integrated RESTful APIs using Spring Boot for backend services and implemented Firebase Realtime Database for real-time data synchronization and user authentication. I worked with MongoDB and MySQL for efficient data storage and management, while collaborating in an Agile (Scrum) team on feature development, debugging, and code reviews. Additionally, I identified and resolved performance issues, enhancing overall application responsiveness and stability.

IoT Factory Machine Monitoring System, Full Stack (Vue.js | Firebase Realtime Database)

University project

Developed a real-time factory machine monitoring system using IoT concepts to track machine status, performance, and alerts. Built a responsive dashboard with Vue.js and integrated Firebase Realtime Database for live data updates. Simulated sensor data and implemented real-time visualization with alert indicators for abnormal conditions, enabling efficient monitoring and quick decision-making.

Tourism Management Application

Android (Java) | Firebase

Developed a tourism app with location services, interactive maps, and booking forms. Integrated Firebase for real-time data storage and user authentication. Designed a user-friendly interface to improve travel planning experience.

Student Marks Visualization App

Flask | Matplotlib

Developed a web application to record and visualize student marks. Implemented interactive chart generation using Matplotlib. Added features for managing entries (Add, Delete, Clear) with a clean web interface.

Python Weather App (CLI + Flask)

A CLI app (weather_cli.py) to get current weather by city

SOFT SKILLS

- Teamwork
- Creativity
- Self-Learning
- Problem-Solving
- Communication
- Time Management
